Diversification and Risk Control Guidelines

The Strategy has established guidelines to ensure the investments of the Strategy are diversified. The assets of the Strategy are invested in a prudent fashion with securities selected for their overall contribution to the investment objective of the Strategy.

Security Level Guidelines: The Strategy typically holds 40 to 60 equity securities, and the individual weight for each equity investment will vary based on FGP's assessment of quality. Each security is limited to a maximum weight of 10% of the market value of the Strategy. The minimum credit quality for any short-term money market investments is 'R1' or 'A'.

Sector Level Guidelines: The Strategy is required to have holdings in a minimum of six sectors. There is no minimum investment requirement within a sector. Total investments in any sector may not exceed the performance benchmark sector weight plus 10%.

Market Capitalization (Cap) Guidelines: The Strategy invests directly and indirectly in a diversified portfolio of stocks, generally with a market cap greater than \$3 billion. Investments of any holding cannot exceed 15% of the company's market cap. The minimum market cap for any direct investment is \$1 billion at the time of purchase.
