

Investing in the FGP Long Term Bond Fund

The depth of our credit team's fundamental research, with members having extensive work experience at Canadian credit rating agencies, combined with our unique credit process, allows us to skillfully analyze credit/special situations and is our core competitive advantage. We employ a multi-strategy approach, including: interest rate anticipation, credit sector/security selection, and yield-enhancing strategies in the context of a long-term, value-oriented investment approach. Our strategy is an actively managed high conviction portfolio where a rigorous risk management process is applied that enables us to generate strong, consistent and repeatable risk-adjusted performance over the long term for our clients.

Philosophy

We believe that superior investment returns are achieved by taking a long-term, bottom-up, value-oriented approach to investing based on detailed fundamental research and analysis. Our proven philosophy revolves around two long-standing core concepts:

Understanding Quality

- We use a rigorous credit process to differentiate the level of risk between companies and each security they issue
- We seek to understand each business so that we can appreciate how a company's financial management and organizational structure complement or detract from the base business risk
- The credit process culminates in the FGP Investment Grade Rating (IGR), an internal risk rating of a company and the securities it issues

Disciplined on Valuation

- We employ a proprietary risk-based valuation tool to select fixed income investments
- Each security has an internal rating based on our internal credit research
- Using the internal rating we then use the proprietary FGP Internal Spread Matrix to determine if the market valuation is attractive
- This unique method of determining value enhances both the buy and sell decision

Investment Structure

Guidelines	
Cash range	0%-10%
Total Federal bonds	Minimum: Benchmark weight - 20%
Total Provincial and municipal bonds	Benchmark weight \pm 20%
Total Corporate bonds	Maximum: Benchmark weight +20%
